MERIDRON · BLUEPRINT CATALOG

START HERE · D1b TRAINER

REV 1 · 25 Oct 2026 · DESIGN CHECKED · FIRST FLIGHT PENDING

THE FOUR STEPS (SAME FOR EVERY DRONE)

1 WATCH — 07_Video: the explainer, once, before you touch anything.

2 DOWNLOAD — You have it: this ZIP with seven folders.

3 BUILD — 05_Build_Guide: 14 steps, one page each, a check at the end of every step.

4 CHECK — Last page of the build guide: tick every box before the first flight.

WHAT IS IN EACH FOLDER

Folder	What it is	Size
01_Cutting	Foam templates: 1:1 PDF on A4 + DXF for CNC/hot wire	167 kB
02_Print	16 STL files + print list. Print each file as often as its name says.	1.6 MB
03_Wiring	Wiring diagram: battery, ESC, motor, receiver, 2 servos	35 kB
04_Firmware_Radio	No flight controller on the D1b: radio setup sheet (channels, throws, failsafe)	110 kB
05_Build_Guide	14 steps with pictures, time and a pass check for each step	1.6 MB
06_Parts_List	Everything to buy, with quantities and CHF prices	2 kB
07_Video	Explainer video (works without sound)	5.1 MB

NAMES

Every file starts with the drone and revision: D1b_Rev1_.... Print files end with how often to print them: ..._print-5x.stl = print 5.

STATUS AND LICENCE

Calculated, not yet flown. Rev 1 becomes 'Flight proven' after the first build in the demonstrator workshop. Report anything that does not fit: every report makes the next revision. This package is for authorized Meridron partners only. Do not pass it on.
